CARBON FOOTPRINT CALCULATOR

Know Your Impact • Protect Our Planet

What is Carbon Footprint?

It is the total amount of CO_2 (carbon dioxide) released into the environment

It is caused by our daily activities

Includes emissions from:

- Transportation
- Electricity usage
- Food consumption
- Household activities

Why is it Important?

- High carbon emissions cause global warming & climate change

Leads to:

- Rising temperatures
- Melting glaciers
- Air pollution

HOW TO REDUCE CARBON FOOTPRINT

- Use public transport
- Save electricity
- Plant trees
- Avoid plastic

Reduce, Reuse, Recycle

Be Part of the Solution, Not Pollution!
